Located: 1465 Harbor Lane, Cutchogue. SCTM# 1000-103-2-1.1

S.E.Q.R.A. NEGATIVE DECLARATION OF ENVIRONMENTAL SIGNIFICANCE:
WHEREAS, the Southold Town Board of Trustees are familiar with this project having visited the site on January 11, 2022, and having considered the survey of property by John Gerd Heidecker dated July 2, 2018, and having considered the plans for this proposed project submitted by Michael Kimack dated November 12, 2021 at the Trustee’s January 13, 2022 work session; and

WHEREAS, on January 19, 2022 the Southold Town Board of Trustees declared itself Lead Agency pursuant to S.E.Q.R.A.; and

WHEREAS, on January 19, 2022 the Southold Town Board of Trustees classified the application as an unlisted action under S.E.Q.R.A.; and

WHEREAS, in reviewing project plans submitted by Michael Kimack dated November 12, 2021, it has been determined by the Board of Trustees that all potentially significant environmental concerns have been addressed as noted herein:

- Navigation: The proposed dock meets standards and does not extend beyond 1/3 across the water body. Depths for the dock terminus are within Town Trustees, New York State Department of Environmental Conservation and United States Army Corps. of Engineers guidelines and there is no recognized Federal/New York State/Town navigation channel in the immediate vicinity of the proposed structure.
- Scope: The proposed dock is comparable to docks on neighboring properties in an area where docks historically are used for commercial and recreational purposes.
• Scope in relation to the riparian rights of shell fishers: The plan allows a standard fixed catwalk to float design that will not impede access for those seeking shellfish and crustacea in season.
• Environmental upkeep: The dock design projects a usual lifespan of 30 years with limited pile replacement so as to minimize disturbance of the bottom.

THEREFORE, according to the foregoing, the Southold Town Board of Trustees Approve and Authorize the preparation of a Notice of Negative Declaration pursuant to SEQRA for the aforementioned project.

2. DESCRIPTION OF ACTION: Jeffrey Patanjo on behalf of LEFKARA HOLDINGS, LLC, c/o NEOFITOS STEFANIDES requests a Wetland Permit and a Coastal Erosion Permit to install 88 linear feet of rock revetment at toe of existing eroded bluff to replace existing temporary sand bags; install 60 cubic yards of clean sand fill and Cape American beach grass on entire bluff to protect property against additional storm erosion. WHEREAS, in reviewing project plans submitted by Jeffrey Patanjo dated October 25, 2021 it has been determined by the Board of Trustees that all potentially significant environmental concerns have been addressed as noted herein:

• Vegetative, non-structural measures are not capable of stabilizing the erosion of the bluff alone.
• Protection of the toe of bluff using hardened structures including rock revetment is necessary.
• No existing rocks or boulders are to be utilized, moved, or relocated on the beach.
• As time progresses, continued soil loss at the toe of the bluff may lead to habitat degradation and bluff instability.
• A site inspection by the Southold Town Board of Trustees recognized erosion on this property and the need for a bluff stabilization/erosion control plan.
